

Taconic Biosciences is seeking a part-time **Veterinarian** (m/f/d) with expertise in generation of genetically modified mouse models to join our passionate, close-knit, dedicated team.

With a history of over 70 years of excellence, Taconic Biosciences is a global team of the best problem solvers in the industry. We partner with our clients to develop winning research strategies that accelerate the discoveries for prevention and treatment of disease.

Taconic employees all over the world show up every day to deliver the best solutions for our clients while caring for ourselves, each other, and especially our animals. If you are a respectful, compassionate individual with a can-do attitude and a desire to do the right thing, we want you to join us!

We are seeking a part-time (16 hours per week) **Veterinarian (m/f/d)** on a permanent position to join our passionate, close-knit, dedicated team in our Leverkusen location.

Your tasks include:

- You are responsible for the health and well-being of our animals (mice) as a responsible veterinarian within the framework of animal care.
- You will advise the management and the managers of the laboratory animal facilities on animal welfare issues (e.g, surgical procedures, anesthesia, analgesia, etc.) and biosecurity
- You are the interface to the authorities and take care of the corresponding duties to provide information.
- You pass on information to the technical staff and participate in the internal training of our employees.
- You will manage the veterinary pharmacy.
- You will run the statutory meetings of the Animal Welfare Body.
- Support scientific staff in writing applications for the authorities.
- Work closely with the AWO and take on the role as Deputy AWO once onboarded and holding the required qualifications.

Your profile:

- You have successfully completed your studies in veterinary medicine and are licensed as a veterinarian in Germany.
- Further training as a specialist veterinarian for laboratory animal science is desirable but not a prerequisite if you are willing to undergo further training (EU-function ABD).
- You have knowledge of the relevant laws, regulations and orders for animal husbandry and animal experiments in a research context
- You have a good command of German and English to be able to communicate with our local and internationally operating team
- Excellent interpersonal and communication skills

Our offer:

- We offer you a variety of challenging and interesting tasks in a team of committed, quality-oriented colleagues with great spirit
- You will be comprehensively trained in your field of work according to your knowledge, skills and aptitudes
- We provide our employees with a competitive salary and other benefits

If you are motivated by new opportunities and seek a stimulating working environment within the life sciences industry, we invite you to join our international team of talented scientists.

If you are interested in this opportunity, please submit your application (CV, motivation letter, references, salary expectation and notice period) through our portal JazzHR:
